

“Original Gentleman” Automatic Door Opener

Residential Access

The Original Gentleman Barrier Free System provides the most economical door automation available for residential swing doors.

The system power opens the door and releases when deactivated. A hydraulic door closer brings the door closed.

The system is controlled by a remote control. It opens when the remote is pressed and stays open until the remote is pressed again.

Key Features

- ✓ Simple Pneumatic Design
- ✓ Easily retrofittable
- ✓ Does not interfere with the existing door hardware
- ✓ Door remains free swinging with manual use there is no resistance to push against
- ✓ Low profile (there is no header above the door), silent operation
- ✓ Extremely reliable – 1 year warranty
- ✓ Reacts immediately to any obstacle and opening door will stop at any point
- ✓ Activated by remote control (uses rolling code technology so it is completely secure)
- ✓ Door strike release system allows the door to stay locked during operation
- ✓ No maintenance
- ✓ Maintains automatic door opener operation even in the event of a power outage
- ✓ Integrates with ECU systems

Optional Features

- ✓ Adapted remote controls for single switch access
- ✓ Offset hinges to provide wider door opening

Specifications
